DEVELOPMENT AND PROTOTYPE

The Model CR2D, $8\frac{1}{2}$ "W X $8\frac{1}{4}$ "D X 7"H clip mounts on standard 28 V.D.C. power rods ($6\frac{1}{2}$ inch spacing). Two units will fit side by side across a standard 19 inch relay rack. Paper drive is by means of a synchronous motor at 12 inches per hour. Speeds up to 36 inches per hour are available by substitution of the appropriate interchangeable drive motors. Paper drive can be stopped by providing a switch closure through studs on front panel. Carriage travel is adjustable from 2 to 5 inches and recorder steps are either 100 or 200 per inch with an internal quick change mechanism.

The maximum operating speed of the recorder is guaranteed to be at least 30 steps per second and even at this speed operation is highly reliable.

The linearity of the system is excellent. Reset is extremely rapid with full 5 inch travel under 0.5 seconds. Reset can also be activated by push button on front panel or through a remote switch closure connected to studs on front panel. The main recording pen is mounted on a solenoid to provide reinforcement marks. An additional event marker may be added as optional equipment.

over

Pens are fed by a large reservoir and will give continuous operation for approximately 72 hours. The standard unit comes supplied with two ounces of ink, a pen filling syringe, an initial roll of 6½" wide paper, a pen cleaner, and an ink starting suction bulb.

SCIENTIFIC PROTOTYPE MFG. CORP. UNCONDITIONALLY GUARANTEES ALL MATERIAL AND WORKMANSHIP, FOR A PERIOD OF ONE YEAR IN NORMAL USE FROM THE DATE OF DELIVERY.

Price \$295.00, f.o.b., New York City.

OPTIONAL ACCESSORIES

Event Marker-----	\$25.00
Replacement Paper-----	4.50 per roll
Replacement 2 oz. bottle of ink-----	1.25
Filling Syringe-----	.50
Pen Cleaner-----	.85
Ink Starter Suction Bulb-----	1.25

Minimum order of accessories \$5.00
